

Topic 1: Printing Statements – Test Cases

1. Print Hello World

Test Case 1

Output: Hello World

Test Case 2

Output: Hello World

2. Print your name

Test Case 1

Output: Sivan

Test Case 2

Output: Ravi

3. Print an integer value

Test Case 1

Output: 10

Test Case 2

Output: 25

4. Print a floating-point number

Test Case 1

Output: 3.5

Test Case 2

Output: 7.25

5. Print a character

Test Case 1

Output: A

Test Case 2

Output: Z

6. Print two integers in one line

Test Case 1

Output: 5 10

Test Case 2

Output: 20 30

7. Print a string along with a number

Test Case 1

Output: Age: 20

Test Case 2

Output: Count: 5

8. Print output in two lines using \n

Test Case 1

Output:

Hello

World

Test Case 2

Output:

Good

Morning

Topic 2: Variables in C – Test Cases

1. Declare an integer variable and print it

Test Case 1

Output: 10

Test Case 2

Output: 50

2. Declare two integer variables and print them

Test Case 1

Output: 5 15

Test Case 2

Output: 20 40

3. Declare a float variable and print it

Test Case 1

Output: 2.5

Test Case 2

Output: 6.75

4. Declare a character variable and print it

Test Case 1

Output: X

Test Case 2

Output: B

5. Change variable value and print updated value

Test Case 1

Output: 20

Test Case 2

Output: 100

6. Add two variables

Test Case 1

Output: 15

Test Case 2

Output: 30

7. Subtract two variables

Test Case 1

Output: 5

Test Case 2

Output: 10

8. Multiply two variables

Test Case 1

Output: 20

Test Case 2

Output: 50

9. Divide two variables

Test Case 1

Output: 4

Test Case 2

Output: 5

10. Assign value later and print

Test Case 1

Output: 10

Test Case 2

Output: 60

Topic 3: Data Types in C – Test Cases

1. Print int variable

Test Case 1

Output: 10

Test Case 2

Output: 99

2. Print float variable

Test Case 1

Output: 3.5

Test Case 2

Output: 8.25

3. Print double variable

Test Case 1

Output: 12.345

Test Case 2

Output: 99.999

4. Print char variable

Test Case 1

Output: A

Test Case 2

Output: M

5. Size of int

Test Case 1

Output: 4

Test Case 2

Output: 4

6. Size of float

Test Case 1

Output: 4

Test Case 2

Output: 4

7. Size of double

Test Case 1

Output: 8

Test Case 2

Output: 8

8. Size of char

Test Case 1

Output: 1

Test Case 2

Output: 1

9. Assign int to float

Test Case 1

Output: 10.0

Test Case 2

Output: 25.0

10. Store char in int

Test Case 1

Output: 65

Test Case 2

Output: 97

1. Print the sum of two integers using +.

Test Case 1

Input: 5 5

Output: 10

Test Case 2

Input: 3 7

Output: 10

Test Case 3

Input: 8 2

Output: 10

2. Print the difference of two integers using -.

Test Case 1

Input: 8 3

Output: 5

Test Case 2

Input: 10 5

Output: 5

Test Case 3

Input: 15 10

Output: 5

3. Print the product of two integers using *.

Test Case 1

Input: 4 5

Output: 20

Test Case 2

Input: 10 2

Output: 20

Test Case 3

Input: 1 20

Output: 20

4. Print quotient and remainder of two integers.

Test Case 1

Input: 9 2

Output: Quotient=4 Remainder=1

Test Case 2

Input: 10 3

Output: Quotient=3 Remainder=1

Test Case 3

Input: 20 4

Output: Quotient=5 Remainder=0

5. Add three integers and print the result.

Test Case 1

Input: 2 3 5

Output: 10

Test Case 2

Input: 1 4 5

Output: 10

Test Case 3

Input: 3 3 4

Output: 10

Topic: Increment / Decrement Operators

(++ --)

Easy Questions

1. Apply pre-increment to a variable.

Test Case 1

Input: 5

Output: 6

Test Case 2

Input: 10

Output: 11

Test Case 3

Input: 0

Output: 1

2. Apply post-increment and print the value.

Test Case 1

Input: 5

Output: 5

Test Case 2

Input: 9

Output: 9

Test Case 3

Input: 0

Output: 0

3. Apply pre-decrement to a variable.

Test Case 1

Input: 10

Output: 9

Test Case 2

Input: 1

Output: 0

Test Case 3

Input: 5

Output: 4

4. Increment a variable twice and print result.

Test Case 1

Input: 5

Output: 7

Test Case 2

Input: 0

Output: 2

Test Case 3

Input: 10

Output: 12

5. Decrement a variable twice and print result.

Test Case 1

Input: 6

Output: 4

Test Case 2

Input: 2

Output: 0

Test Case 3

Input: 10

Output: 8

Topic: Relational Operators (> < == != >= <=)

Easy Questions

1. Compare two numbers using >.

Test Case 1

Input: 10 5

Output: 1

Test Case 2

Input: 3 8

Output: 0

Test Case 3

Input: 7 7

Output: 0

2. Compare two numbers using <.

Test Case 1

Input: 5 10

Output: 1

Test Case 2

Input: 9 2

Output: 0

Test Case 3

Input: 4 4

Output: 0

3. Compare two numbers using ==.

Test Case 1

Input: 5 5

Output: 1

Test Case 2

Input: 3 4

Output: 0

Test Case 3

Input: 0 0

Output: 1

4. Compare two numbers using !=.

Test Case 1

Input: 5 3

Output: 1

Test Case 2

Input: 4 4

Output: 0

Test Case 3

Input: 9 1

Output: 1

5. Compare two numbers using >= and <=.

Test Case 1

Input: 5 5

Output: 1 1

Test Case 2

Input: 10 5

Output: 1 0

Test Case 3

Input: 3 7

Output: 0 1

Topic: Logical Operators (&& || !)

Easy Questions

1. Use logical AND on two non-zero values.

Test Case 1

Input: 5 3

Output: 1

Test Case 2

Input: 1 1

Output: 1

Test Case 3

Input: 0 5

Output: 0

2. Use logical OR on two values.

Test Case 1

Input: 0 5

Output: 1

Test Case 2

Input: 0 0

Output: 0

Test Case 3

Input: 3 7

Output: 1

3. Apply logical NOT on zero.

Test Case 1

Input: 0

Output: 1

Test Case 2

Input: 0

Output: 1

Test Case 3

Input: 0

Output: 1

4. Apply logical NOT on non-zero value.

Test Case 1

Input: 5

Output: 0

Test Case 2

Input: 1

Output: 0

Test Case 3

Input: -3

Output: 0

5. Check two conditions using AND and OR.

Test Case 1

Input: 5 10

Output: 1

Test Case 2

Input: 0 5

Output: 1

Test Case 3

Input: 0 0

Output: 0

Topic: Assignment Operators (= += -= *= /= %=)

Easy Questions

1. Assign a value and print it.

Test Case 1

Input: 10

Output: 10

Test Case 2

Input: 5

Output: 5

Test Case 3

Input: 0

Output: 0

2. Use += operator.

Test Case 1

Input: 10 5

Output: 15

Test Case 2

Input: 3 7

Output: 10

Test Case 3

Input: 0 4

Output: 4

3. Use -= operator.

Test Case 1

Input: 10 5

Output: 5

Test Case 2

Input: 20 10

Output: 10

Test Case 3

Input: 5 5

Output: 0

4. Use *= operator.

Test Case 1

Input: 4 5

Output: 20

Test Case 2

Input: 3 3

Output: 9

Test Case 3

Input: 10 2

Output: 20

5. Use /= and %= operators.

Test Case 1

Input: 9 2

Output: 4 1

Test Case 2

Input: 10 5

Output: 2 0

Test Case 3

Input: 7 3

Output: 2 1
